ACCEPTANCE TEST REPORT

Layali KOT & Billing — ready for pilot

Build f39a95b · tested 14 Oct 2026 · web counter (Next.js), staff phone app (Expo) and server API · every suite run on a fresh database

Verdict: Pass — ready to start a pilot at the client

All 231 automated test cases pass. They cover the full service day: sign-in, punching orders on the counter and on phones, KOT routing and copies, moving and merging tables, voids, discounts, split payments, GST invoices, private bookings, the cash drawer and Z-report, printing, and admin. Go live after the on-site checks listed below (real printer, real phone, Wi-Fi drop, accountant sign-off on GST).

231/231 test cases passed

16 functional areas

18 defects found and fixed during testing

0 open defects

Test cases

ID	AREA	SCENARIO	EXPECTED	RESULT
AUTH-01	Setup & sign-in	Fresh install asks for owner setup	setup screen shown	Pass
AUTH-02	Setup & sign-in	Data is not visible without sign-in	Refused: not signed in	Pass
AUTH-03	Setup & sign-in	Weak owner password refused	Refused: invalid	Pass
AUTH-04	Setup & sign-in	7-digit PIN refused (not truncated)	Refused: invalid	Pass
AUTH-05	Setup & sign-in	Simultaneous setups create exactly one owner	one succeeds, rest refused	Pass
AUTH-06	Setup & sign-in	Owner signs in with username + password	Allowed	Pass
AUTH-07	Setup & sign-in	Tables and menu exist right after setup	11 tables	Pass
AUTH-08	Setup & sign-in	Login injection payload refused	Refused: invalid	Pass
AUTH-09	Setup & sign-in	Duplicate username refused (case-insensitive)	Refused: conflict / already done	Pass
AUTH-10	Setup & sign-in	Staff list never exposes PINs or hashes	no pin fields	Pass
DEV-01	Devices & sessions	Counter computers and staff phones pair with a code	3 devices paired	Pass
DEV-02	Devices & sessions	Pairing code is single-use	Refused: not signed in	Pass
DEV-03	Devices & sessions	Kitchen display devices are not part of the product	Refused: invalid	Pass
DEV-04	Devices & sessions	Expired pairing code refused	Refused: not signed in	Pass
DEV-05	Devices & sessions	Same code used at once pairs only one device	only one succeeds	Pass
DEV-06	Devices & sessions	PIN sign-in refused on an unpaired browser	Refused: not signed in	Pass
DEV-07	Devices & sessions	PIN injection payload refused	Refused: invalid	Pass
DEV-08	Devices & sessions	5 wrong PINs lock the account (even the right PIN)	Account locked	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
DEV-09	Devices & sessions	Owner unlocks the account	Allowed	Pass
DEV-10	Devices & sessions	Cashier signs in with PIN at the counter	Allowed	Pass
DEV-11	Devices & sessions	Cashier signs in with PIN on the phone	Allowed	Pass
DEV-12	Devices & sessions	A stolen session token is useless without its device	Refused: not signed in	Pass
DEV-13r	Devices & sessions	Garbage token (random) is a clean 401	Refused: not signed in	Pass
DEV-13h	Devices & sessions	Garbage token (huge) is a clean 401	Refused: not signed in	Pass
DEV-14	Devices & sessions	Owner makes the counter computer the print station	Allowed	Pass
DEV-15	Devices & sessions	A phone cannot be the print station	Refused: invalid	Pass
ORD-01	Orders & KOT	Phone punches an order for Table 2	Allowed	Pass
ORD-02	Orders & KOT	One KOT per station (kitchen, bar, shisha)	3 KOTs	Pass
ORD-03	Orders & KOT	Price comes from the menu, not the device	₹99, not ₹1	Pass
ORD-04	Orders & KOT	Order is recorded under the signed-in cashier	recorded as Riya	Pass
ORD-05	Orders & KOT	Item note reaches the kitchen ticket	'No onion' on KOT	Pass
ORD-06	Orders & KOT	Table shows as occupied	OCCUPIED	Pass
ORD-07	Orders & KOT	Unknown item refused	Refused: invalid	Pass
ORD-08	Orders & KOT	Zero quantity refused	Refused: invalid	Pass
ORD-09	Orders & KOT	Quantity over 99 refused	Refused: invalid	Pass
ORD-10	Orders & KOT	Fractional quantity refused	Refused: invalid	Pass
ORD-11	Orders & KOT	Empty order refused	Refused: invalid	Pass
ORD-12	Orders & KOT	Unknown table refused	Refused: not found	Pass
ORD-13	Orders & KOT	Out-of-stock item refused	Refused: conflict / already done	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
ORD-14	Orders & KOT	Second round adds one new kitchen KOT	1 new KOT	Pass
ORD-15	Orders & KOT	5 tables punched at the same moment all succeed	all five succeed	Pass
ORD-16	Orders & KOT	KOT numbers stay unique under load	10 unique	Pass
ORD-17	Orders & KOT	Two devices on the same empty table → one running bill	1 open order	Pass
ORD-18	Orders & KOT	Retried punch (same key) does not duplicate the KOT	1 KOT, same order	Pass
ORD-19	Orders & KOT	4 simultaneous taps create exactly one KOT	1 KOT	Pass
KOT-01	KOT status	Manager marks a ticket served	Allowed	Pass
KOT-02	KOT status	Served ticket cannot go back to NEW	Refused: conflict / already done	Pass
KOT-03	KOT status	Invalid status refused	Refused: invalid	Pass
KOT-04	KOT status	Cashier cannot change ticket status	Refused: no permission	Pass
TBL-01	Tables: move & merge	Move to an occupied table refused	Refused: conflict / already done	Pass
TBL-02	Tables: move & merge	Move with a stale 'from' table refused	Refused: conflict / already done	Pass
TBL-03	Tables: move & merge	Move Table 2 → Couple Cabin	Allowed	Pass
TBL-04	Tables: move & merge	Old table freed, new one occupied, tickets follow	VACANT / OCCUPIED	Pass
TBL-05	Tables: move & merge	Merge a table into itself refused	Refused: invalid	Pass
TBL-06	Tables: move & merge	Merge into a table without a bill refused	Refused: not found	Pass
TBL-07	Tables: move & merge	Merge Table 4 into Couple Cabin	Allowed	Pass
TBL-08	Tables: move & merge	Merged bill holds both tables' items; Table 4 freed	items combined	Pass
VOID-01	Voids	Cashier void without manager PIN refused	Refused: Manager PIN required	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
VOID-02	Voids	Cashier's own PIN cannot approve a void	Refused: no permission	Pass
VOID-03	Voids	Manager PIN approves the void	Allowed	Pass
VOID-04	Voids	Same item cannot be voided twice	Refused: conflict / already done	Pass
VOID-05	Voids	Void of a non-existent line refused	Refused: invalid	Pass
VOID-06	Voids	Partial void (1 of 2 burgers) keeps the other	1 burger left	Pass
VOID-07	Voids	Whole-order cancel frees the table and cancels open tickets	VACANT, KOTs CANCELLED	Pass
BIL-01	Billing	Cashier opens the shift with ₹2000 float	Allowed	Pass
BIL-02	Billing	Second shift cannot open while one is open	Refused: invalid	Pass
BIL-03	Billing	Discount larger than the bill refused	Refused: invalid	Pass
BIL-04	Billing	GST other than the lounge rate (or 0) refused	Refused: invalid	Pass
BIL-05	Billing	Unknown payment method refused	Refused: invalid	Pass
BIL-06	Billing	Cashier discount above 10% needs a manager PIN	Refused: no permission	Pass
BIL-07	Billing	Partial payment keeps the bill open and the table occupied	open, OCCUPIED	Pass
BIL-08	Billing	Split Cash + UPI settles the bill and frees the table	closed, VACANT	Pass
BIL-09	Billing	Retried settlement (same key) does not pay twice	3 payments total	Pass
BIL-10	Billing	Settled bill cannot be paid again	Refused: conflict / already done	Pass
BIL-11	Billing	Settled bill gets a GST invoice serial	YYYY-YY/0001	Pass
BIL-12	Billing	Small discount (≤10%) needs no approval	allowed, bill closed	Pass
BIL-13	Billing	Invoice serials are consecutive	…/0002	Pass
BIL-14	Billing	Manager PIN approves a 30% discount; voided items not charged	allowed, bill closed	Pass
BIL-15	Billing	GST-exempt bill on Khata (credit) settles at 0% tax	allowed, bill closed	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
BKG-01	Bookings	VIP Lounge booked with ₹500 advance	Allowed	Pass
BKG-02	Bookings	Same space cannot be double-booked	Refused: conflict / already done	Pass
BKG-03	Bookings	Unknown venue refused	Refused: invalid	Pass
BKG-04	Bookings	Booking advance is deducted when settling	closes with advance credited	Pass
BKG-05	Bookings	Settling the bill releases the booking	CLOSED	Pass
BKG-06	Bookings	Booking can be released by its number	Allowed	Pass
SFT-01	Shift close (Z-report)	Cash drop recorded	Allowed	Pass
SFT-02	Shift close (Z-report)	Expected cash = float + cash sales − drops	₹2178	Pass
SFT-03	Shift close (Z-report)	Sales exclude voids and merged duplicates	₹1688	Pass
SFT-04	Shift close (Z-report)	Each real bill counted once	5 bills	Pass
SFT-05	Shift close (Z-report)	Shift closed by the signed-in cashier	Riya	Pass
PRN-01	Printing	Every punch, void, settlement and shift close queued a print	kot, cancel, bill, zreport present	Pass
PRN-02	Printing	Each KOT prints station, staff and admin copies	3 copies	Pass
PRN-03	Printing	KOT slips carry no prices	no price field	Pass
PRN-04	Printing	Receipts carry the invoice serial and GSTIN	all receipts	Pass
PRN-05	Printing	A phone cannot take print jobs	Refused: no permission	Pass
PRN-06	Printing	Everyone sees the counter printer online, nothing waiting	online, 0 pending	Pass
PRN-07	Printing	Owner turns the admin copy off → station + staff copies only	2 copies	Pass
PRN-08	Printing	A failed print shows with its reason	FAILED · Paper out	Pass
PRN-09	Printing	Retry sends it back to the printer	claimed again	Pass
PRN-10	Printing	Reprint is one station copy marked REPRINT	1 copy, reprint	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
PRN-11	Printing	Phones see when the counter printer goes offline	online = false	Pass
MNU-01	Menu & lounge settings	Menu item with a blank name refused	Refused: invalid	Pass
MNU-02	Menu & lounge settings	Negative price refused	Refused: invalid	Pass
MNU-03	Menu & lounge settings	Unknown station refused	Refused: invalid	Pass
MNU-04	Menu & lounge settings	Duplicate item name refused	Refused: conflict / already done	Pass
MNU-05	Menu & lounge settings	Owner adds a new item	Allowed	Pass
MNU-06	Menu & lounge settings	New item can be ordered right away at its price	₹40	Pass
MNU-07	Menu & lounge settings	Manager can mark out of stock	Allowed	Pass
MNU-08	Menu & lounge settings	Manager cannot change prices	Refused: no permission	Pass
MNU-09	Menu & lounge settings	Cashier cannot change stock	Refused: no permission	Pass
MNU-10	Menu & lounge settings	Invalid GSTIN refused	Refused: invalid	Pass
MNU-11	Menu & lounge settings	GST rate must be 0/5/12/18/28	Refused: invalid	Pass
MNU-12	Menu & lounge settings	Only the owner changes lounge settings	Refused: no permission	Pass
SEC-01	Access & staff safety	Cashier cannot open staff management	Refused: no permission	Pass
SEC-02	Access & staff safety	Manager cannot manage devices	Refused: no permission	Pass
SEC-03	Access & staff safety	Live updates need sign-in	Refused: not signed in	Pass
SEC-04	Access & staff safety	The last owner cannot be demoted	Refused: invalid	Pass
SEC-05	Access & staff safety	The owner cannot deactivate themselves	Refused: invalid	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
SEC-06	Access & staff safety	Deactivating staff signs them out everywhere	Refused: not signed in	Pass
SEC-07	Access & staff safety	PIN session idle 16 minutes is ended by the server	Refused: not signed in	Pass
SEC-08	Access & staff safety	A revoked device can no longer sign anyone in	Refused: not signed in	Pass
SEC-09	Access & staff safety	Audit log records sign-ins, voids, discounts, settlements, stock and settings	all present	Pass
PQ-01	Print queue	Staff phones can be paired again	As described	Pass
PQ-02	Print queue	Station displays still cannot be paired	As described	Pass
PQ-03	Print queue	No print station configured yet	As described	Pass
PQ-04	Print queue	A phone cannot be the print station	As described	Pass
PQ-05	Print queue	Cashier cannot choose the print station	As described	Pass
PQ-06	Print queue	Admin makes the counter computer the print station	As described	Pass
PQ-07	Print queue	Station shows online	As described	Pass
PQ-08	Print queue	Phone punches an order	As described	Pass
PQ-09	Print queue	KOT job is waiting	As described	Pass
PQ-10	Print queue	A phone cannot claim print jobs	As described	Pass
PQ-11	Print queue	Locked counter (no staff signed in) still claims jobs	As described	Pass
PQ-12	Print queue	Job carries both station tickets	As described	Pass
PQ-13	Print queue	Each ticket prints station, staff and admin copies	As described	Pass
PQ-14	Print queue	Queue label counts all 6 slips	As described	Pass
PQ-15	Print queue	KOT payload has no prices	As described	Pass
PQ-16	Print queue	A claimed job is not handed out twice	As described	Pass
PQ-17	Print queue	Station confirms the print	As described	Pass
PQ-18	Print queue	Job shows as printed	As described	Pass
PQ-19	Print queue	Void with manager PIN	As described	Pass
PQ-20	Print queue	Phone asks the counter to print the bill	As described	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
PQ-21	Print queue	Phone settles the bill	As described	Pass
PQ-22	Print queue	Phone closes the shift	As described	Pass
PQ-23	Print queue	Counter receives cancel, bill, receipt and Z-report in order	As described	Pass
PQ-24	Print queue	Receipt carries invoice number and lounge GSTIN	As described	Pass
PQ-25	Print queue	Failed print shows with its reason	As described	Pass
PQ-26	Print queue	Retry puts it back in the queue	As described	Pass
PQ-27	Print queue	Retried job is printed again	As described	Pass
PQ-28	Print queue	Reprinting a void docket prints a cancel slip	As described	Pass
PQ-29	Print queue	A reprint is one station copy marked reprint	As described	Pass
PQ-30	Print queue	Owner turns off the admin copy	As described	Pass
PQ-31	Print queue	KOT now prints station and staff copies	As described	Pass
PQ-32	Print queue	Cashier cannot change copy settings	As described	Pass
PQ-33	Print queue	Anonymous print requests are refused	As described	Pass
PQ-34	Print queue	Revoked station cannot claim jobs	As described	Pass
WEB-01	Web counter screens	Session survives a page reload	As described	Pass
WEB-02	Web counter screens	Cashier sees counter tabs, not admin tabs	As described	Pass
WEB-03	Web counter screens	Big discount asks for manager approval	As described	Pass
WEB-04	Web counter screens	Cancelled approval leaves the bill open	As described	Pass
WEB-05	Web counter screens	No false "settled" toast after cancel	As described	Pass
WEB-06	Web counter screens	Manager PIN approves and the bill settles with discount	As described	Pass
WEB-07	Web counter screens	Only one approval dialog appeared (Enter did not re-submit)	As described	Pass
WEB-08	Web counter screens	Lock switches staff	As described	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
WEB-09	Web counter screens	Cashier void dialog asks for a manager PIN	As described	Pass
WEB-10	Web counter screens	Offline punch shows an error, not a success toast	As described	Pass
WEB-11	Web counter screens	Offline punch keeps the cart	As described	Pass
WEB-12	Web counter screens	Nothing printed for a failed punch	As described	Pass
WEB-13	Web counter screens	Retry after failure sends exactly one KOT	As described	Pass
WEB-14	Web counter screens	Revoked terminal drops to sign-in on next request	As described	Pass
WEB-15	Web counter screens	Still signed in at 4m30s idle	As described	Pass
WEB-16	Web counter screens	Activity resets the idle timer	As described	Pass
WEB-17	Web counter screens	5 min idle locks the terminal and ends the server session	As described	Pass
WEB-18	Web counter screens	Lockout message shown, correct PIN refused while locked	As described	Pass
WEB-19	Web counter screens	No unexpected browser alerts	As described	Pass
PRT-01	Printed slips	Invalid GSTIN is rejected	As described	Pass
PRT-02	Printed slips	Admin saves lounge details	As described	Pass
PRT-03	Printed slips	Punch prints automatically	As described	Pass
PRT-04	Printed slips	3 stations × 3 copies = 9 KOT slips	As described	Pass
PRT-05	Printed slips	Copies are labelled kitchen, staff and admin	As described	Pass
PRT-06	Printed slips	Slips show KITCHEN, BAR and SHISHA with the table	As described	Pass
PRT-07	Printed slips	KOT slips carry no prices	As described	Pass
PRT-08	Printed slips	Shisha slip shows the session time	As described	Pass
PRT-09	Printed slips	Reprint from KOT log	As described	Pass
PRT-10	Printed slips	Reprint is a single slip marked REPRINT	As described	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
PRT-11	Printed slips	Void prints a cancel slip	As described	Pass
PRT-12	Printed slips	Cancel slip says CANCEL / DO NOT PREPARE	As described	Pass
PRT-13	Printed slips	Cancel prints kitchen, staff and admin copies	As described	Pass
PRT-14	Printed slips	Cancel slip shows the plain item name and reason	As described	Pass
PRT-15	Printed slips	Print bill prints	As described	Pass
PRT-16	Printed slips	Bill shows lounge name, address and GSTIN	As described	Pass
PRT-17	Printed slips	Unpaid bill is titled BILL with amount due	As described	Pass
PRT-18	Printed slips	Voided item is not on the bill	As described	Pass
PRT-19	Printed slips	Settling prints the receipt	As described	Pass
PRT-20	Printed slips	Settled receipt is a TAX INVOICE with a GST serial	As described	Pass
PRT-21	Printed slips	Receipt lists the payment	As described	Pass
PRT-22	Printed slips	Order stores the invoice number	As described	Pass
PRT-23	Printed slips	Closing the shift prints the Z-report	As described	Pass
PRT-24	Printed slips	Z-report shows drawer reconciliation	As described	Pass
PRT-25	Printed slips	Zero discount prints without a minus sign	As described	Pass
PRT-26	Printed slips	Order punched on a phone prints at the counter	As described	Pass
PRT-27	Printed slips	Phone KOT slip is for Table 6	As described	Pass
PRT-28	Printed slips	Counter shows it is the printer	As described	Pass
PRT-29	Printed slips	New staff roles are Admin, Manager, Cashier only	As described	Pass
PRT-30	Printed slips	Pairing offers counter computer and staff phone only	As described	Pass
PRT-31	Printed slips	Lounge settings persist on the server	As described	Pass
PRT-32	Printed slips	No unexpected alerts	As described	Pass
APP-01	Phone app	Cashier signs in on a staff phone	As described	Pass

ID	AREA	SCENARIO	EXPECTED	RESULT
APP-02	Phone app	Printer looks healthy (no warning banner)	As described	Pass
APP-03	Phone app	Phone order prints KOT slips at the counter	As described	Pass
APP-04	Phone app	Slips are for Table 3, kitchen and bar	As described	Pass
APP-05	Phone app	Double tap still sends one set of KOTs	As described	Pass
APP-06	Phone app	No duplicate print for the double tap	As described	Pass
APP-07	Phone app	Print bill on the phone prints at the counter	As described	Pass
APP-08	Phone app	Printed bill has GSTIN and amount due	As described	Pass
APP-09	Phone app	Reprint on the phone prints at the counter	As described	Pass
APP-10	Phone app	Cashier sees Bookings and Cash drawer	As described	Pass
APP-11	Phone app	Cashier does not see admin rows	As described	Pass
APP-12	Phone app	Phone books the VIP Lounge	As described	Pass
APP-13	Phone app	Phone releases the booking (after confirm)	As described	Pass
APP-14	Phone app	Phone opens the shift	As described	Pass
APP-15	Phone app	Settling on the phone prints the receipt at the counter	As described	Pass
APP-16	Phone app	Receipt is a TAX INVOICE with a serial	As described	Pass
APP-17	Phone app	Closing the shift on the phone prints the Z-report	As described	Pass
APP-18	Phone app	Z-report shows the drawer	As described	Pass
APP-19	Phone app	Owner sees Menu, Lounge details, Staff and Devices	As described	Pass
APP-20	Phone app	Owner marks an item out of stock from the phone	As described	Pass
APP-21	Phone app	Lounge details save from the phone	As described	Pass
APP-22	Phone app	Staff list shows the team	As described	Pass
APP-23	Phone app	Devices show the counter as the printer	As described	Pass
APP-24	Phone app	Owner creates a pairing code from the phone	As described	Pass

Defects found and fixed

- `Orders` Simultaneous punches lost orders and reused KOT numbers (2 of 5 failed in a rush). Numbers now come from atomic counters.
- `Orders` Two devices could open two bills on one table at the same moment. The database now allows one running bill per table.
- `Orders` A device could send its own price (₹1 burger). Prices now always come from the menu.
- `Orders` Out-of-stock items could still be ordered.
- `Orders` Double tap or a retry after a timeout sent duplicate KOTs. Orders and payments now carry a request key.
- `KOT` A served ticket could be set back to NEW. Tickets now only move forward.
- `Tables` Moving a table trusted the device's 'from' table and could free a table with guests. Stale moves are refused.
- `Voids` The same item could be voided twice; voids were possible on settled bills.
- `Billing` A partial payment closed the bill and freed the table. The server now works out the total and closes only when fully paid.
- `Billing` Paying twice was possible; bills had no GST invoice serial. Settled bills get consecutive serials per financial year.
- `Bookings` A private space could be double-booked; Release from the web never worked.
- `Cash drawer` Merged bills were counted twice in the Z-report, and tax included voided items.
- `Sign-in` No real sign-in existed: anyone could call the API, the PIN check could be bypassed, and a refresh logged in as admin. Now: device pairing, server-checked PINs, roles, lockouts and audit log.
- `Sign-in` A 7-digit PIN was silently cut to 6 digits; two simultaneous setups could create two owners.
- `Printing` Printing used the browser page and could print the whole screen. Slips now print from an 80 mm template through one counter print station.
- `Printing` The bill printed a fake GSTIN and lounge settings were never saved.
- `Menu` New menu items were not validated (blank name, negative price, duplicate names).
- `Phone app` Confirmations did nothing in the app's web build; staff phones could not print. Phones now print at the counter.

Before go-live (on site)

1. `Printer` Connect the 80 mm thermal printer to the counter PC, set paper 80 mm / no margins, start Chrome with --kiosk-printing, choose that PC as print station, and print one

KOT, one bill and one Z-report.

2. `Phones` Install the app on one real Android phone, pair it, punch an order and settle a bill; check the keyboard and back button on the sheets.
3. `Wi-Fi` Switch the counter's Wi-Fi off for a minute during service: slips must print when it is back (they wait in the print queue).
4. `Tax` Confirm the GST rate and invoice format with the lounge's accountant, and whether shisha or cabin rent need a different rate.
5. `Data` Enter the real lounge name, address, phone and GSTIN; replace the sample menu prices; delete the demo order LY-1001 created on first install.
6. `Staff` Create real staff with their own PINs; give manager PINs only to managers (they approve voids and big discounts).
7. `Server` Run on HTTPS, or set COOKIE_SECURE=false on a plain-HTTP local network; schedule daily MongoDB backups.

Limits of this test

- Tests run against a local copy of the system with a test database, not the client's hardware.
- The phone app was tested as its web build in Chrome at phone size, not on a physical phone.
- Slips were checked as rendered 80 mm documents; paper width and cutting depend on the printer driver.
- Hourly cabin charges are worked out on the cashier's screen; the server checks food, drinks and GST but not the hours billed.
- Load was tested with a few devices at once (rush of 5 tables), not dozens of devices.
